Education

Moscow Engineering Physics Institute | **Sep 2019 – Aug 2023**
Bachelor's degree in Electronics and Nanoelectronics | *Moscow, Russia*

GPA: 4.10 out of 5

Moscow Engineering Physics Institute | **Sep 2023 – Aug 2025**
Master's degree in Software Engineering | *Moscow, Russia*

GPA: 3.75 out of 5

Relevant coursework:

- Mathematical Analysis
- Algorithms
- Linear Algebra
- Microcontroller programming
- Programming with C, Python
- Parallel programming

Experience

Yandex Go Automation Group | **Apr 2023 – present**
Backend Developer | *Moscow, Russia*

- Implemented new features and bugfixes in Python3 code generation framework and CI system.
- Automated custom linting configuration and pre-commit hooks installation on VSCode workspace setup.

Projects

Language learning flashcard app | *Python, Django, Swift* | **Apr 2023**

- Built a Django REST API with token authentication to track users' flashcard decks.
- Built IOS app network layer with Swift to communicate with Django backend.

Full-stack messaging app | *Django, React, OAuth2* | **Jan 2023 - present**

- Frontend web app built with React.js, react-router, react-redux.
- Backend API built with Django/DRF. Implemented OAuth2 authentication.
- Project deployed to pythonanywhere.com: Click to test the deployed web app
- ○ reatlaz/messenger

Training Programs

IOS Yandex Intensive Course | **Apr 2023**
Learning Program by Yandex at Sirius University

- Attended to live IOS development lectures by Yandex employees at Sirius University.
- Worked in a team of 6. Built backend and network layer for a full-stack language learning mobile app.

Deep Python, Golang, full-stack development
Online bootcamps by VK education | *Click to view certificates*

- Attended to online lectures by VK employees.
- Studied Python, JavaScript, Go. Built a messaging web app, a Telegram chat bot and several small web apps.

Achievements

Leetcode - solved 80 coding problems
Algorithms and coding questions | *Account link*

- 35 easy; 43 medium; 2 hard

Dobrahack 2.0 | **Apr 2021**
Hackathon Champion | *Click to view certificate*

- Managed the database for a Telegram chatbot.
- Worked in a team of 4.

Technical Skills

Languages: Python, Go, Swift, SQL, TypeScript, C/C++, Bash, HTML/CSS
Developer Tools: Git, VS Code, PyCharm, Postman, Xcode, Vim
Technologies/Frameworks: Django/DRF, pytest, PostgreSQL, MySQL, Redis, Celery, Nginx, Docker, React, Flask
